DETAILED ACTION

Continued Prosecution Application

1. The request filed on mm for a Continued Prosecution Application (CPA) under 37 CFR 1.53(d) based on parent Application No. 09/482,085 is acceptable and a CPA has been established. An action on the CPA follows.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

3. Claims 19-24 and 31-32 rejected under 35 U.S.C. 102(e) as being anticipated by Okada et al.

Regarding claims 19-24 and 31-32, Okada discloses a recording and reproducing apparatus for recording MPEG transport stream data and management

information for supporting the MPEG stream on and from a medium (column 11-12, 15, 17, Figs.8,14, 18).

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

5. Claims 3-5,7,9,11, 14-18,25-30 are rejected under 35 U.S.C. 103(a) as being unpatentable over Okada et al (6,266,483) in view of Kikuchi et al (6,112,009).

Regarding claims 3-5,7,9,11, 14-18 and 25-30, Okada discloses a recording and reproducing apparatus for recording MPEG transport stream data and management information for supporting the MPEG stream on and from a medium (column 11-12, 15, 17, Figs.8,14, 18).

Art Unit: 2615

Okada fails to teach that the stream data is provided with partial packets . Kikuchi teaches an apparatus that that has a recording means for forming the recording data of objects on a recording medium , the stream data formed as data packs, each pack comprises data packets, a data packet comprises an application packet (Figs. 6, 35-39) and each packet has a time stamp and ID (columns 20-21). Kikuchi further teaches partial application obtain by slitting the application packet at boundary of stream packets (partial audio data or remaining audio data of a preceding audio frame)(Fig. 44, column 22).

It would have been obvious to one of ordinary skill in the art to modify Okada with Kikuchi by using a recording means as taught by Kikuchi with the apparatus of Okada for providing partial application to the packets of application thereby enhancing the capability of the apparatus of Okada in improving access the application data .

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Lenihan et al , Na et al , Kondo et al and Fujinami teach apparatus for recording MPEG transport stream.
